Your Guide To Hot Tub Water Care

Crystal clear hot tub water is achieved by maintaining proper circulation, filtration, & water balance.

Start Up Procedure – Power Brome(15) 1000L

The steps below should be followed in the order presented.

Step 1: Add 60ml of **SCALE CONTROL**(4). Wait **15 minutes** before continuing.

Step 2: Add 100ml (3 ½ ounces) of **SUPER ENZYME**(17). Wait **15 min.** before continuing.

Step 3: Add 27 grams (2 Tablespoons) of **POWER BROME**(15).

Circulate for a minimum of 15 minutes with the cover off! Do not use the hot tub or replace the cover until sanitizer level is below 5ppm.

Step 4: Add 30ml (1 ounce) of **CLARIFIER**(6). Wait **15 minutes** before continuing.

Step 5: Add 40 grams (3 Tablespoons) of **FEELING**(20). Wait **15 minutes** before continuing.

Step 6: Add the floating Br/Cl dispenser full of pucks.

Step 7: In my tub, I need to add: ____ cups of Muriatic acid and ____ grams of Protection(10).

Weekly Maintenance Procedure – Power Brome(15) 1000L

The steps below should be followed in the order presented.

Step 1: Add 30ml (1 ounce) of **SCALE CONTROL**(4). Wait **15 minutes** before continuing.

Step 2: Add 100ml (3 ½ ounces) of **SUPER ENZYME**(17). Wait **15 min.** before continuing.

Step 3: Add 27 grams (2 Tablespoons) of **POWER BROME**(15).

Circulate for a minimum of 15 minutes with the cover off! Do not use the hot tub or replace the cover until sanitizer level is below 5ppm.

Step 4: Add 30ml (1 ounce) of **CLARIFIER**(6). Wait **15 minutes** before continuing.

Step 5: Add 40 grams (3 Tablespoons) of **FEELING**(20).

Periodic Maintenance Procedure – Power Brome(15)

- Clean the filter using **FILTER CLEANER**(7) monthly.
- For periodic super chlorination, add 30 grams, (2 Tablespoons + 1 Teaspoon) of **POWER BROME**(15). Add to the deepest area of the tub. Do not use or replace cover until the chlorine level has dropped below 5ppm.
- If water develops a musty smell or algae appears, follow periodic super chlorination procedure. When foam or sudsing first appear, use **FOAM KILL**(5) as required. Use **CLEANER BRIGHTENER**(8) to remove dirt marks and scum line. This will keep your tub sparkling clean. Apply **TOP**(23) to protect and beautify the cover. Now is the time to bring a sample of hot tub water to us at *Harbour Spas* for a complete water analysis.
