Your Guide To Hot Tub Water Care

Crystal clear hot tub water is achieved by maintaining proper circulation, filtration, & water balance.

Start Up Procedure – Super Spa SWAT 1300L

The steps below should be followed in the order presented.

Step 1: Add 55 grams (1/4 cup + ½ tsp) of **FEELING**(20). Wait **15 Min.** before continuing.

Step 2: Add 27 grams (2 Tablespoons) of **BANG**(19).

Circulate for a minimum of 20 minutes with the cover off! Do not use or replace the cover until the sanitizer level is below 5ppm.

Step 3: Add 101 grams (1/4 cup + 2 teaspoons) of **SUPER SPA SWAT**.

Step 4: In my tub I need to add: ____ cups of Muriatic acid and ____ grams of Protection(10).

Weekly Maintenance Procedure – Super Spa SWAT 1300L

The steps below should be followed in the order presented.

Your alkalinity needs to be between 100 & 120ppm and your pH needs to be between 7.2 and 7.8 or Care Free will “turn off.”

Step 1: Add 55 grams (1/4 cup + ½ tsp) of **FEELING**(20). Wait **15 Min.** before continuing.

Step 2: Add 27 grams (2 Tablespoons) of **BANG**(19).

Circulate for a minimum of 20 minutes with the cover off! Do not use or replace the cover until the sanitizer level is below 5ppm.

Step 3: Add 40 grams (1/4 cup + 2 teaspoons) of **SUPER SPA SWAT**.

Always ensure that the sanitizer level is between 3 and 5ppm before using the hot tub.

Mid-Week Maintenance

Add 27 grams (2 Tablespoons) of **BANG**(19) mid-week if chlorine levels are low. *Circulate for a minimum of 20 minutes with the cover off! Do not use the hot tub or replace the cover until the sanitizer level is below 5ppm.*

Periodic Maintenance Procedure – Super Spa SWAT

- Clean the filter using **FILTER CLEANER**(7) monthly.
- For periodic super chlorination, add 41 grams, (3 Tablespoons + 1 teaspoon) of **BANG**(19). Add to the deepest area of the tub. Do not use or replace cover until the chlorine level has dropped below 5ppm.
- If water develops a musty smell or algae appears, follow periodic super chlorination procedure. When foam or sudsing first appear, use **FOAM KILL**(5) as required. Clean the filter at every start up and at least once a month. Use **CLEANER BRIGHTENER**(8) to remove dirt marks and scum line. This will keep your tub sparkling clean. Apply **TOP**(23) to protect and beautify the cover. Now is the time to bring a sample of hot tub water to us at *Harbour Spas* for a complete water analysis.
